VR™ Versatile Rescue Vests

Designed to provide extra shock absorption with polyethylene foam. Made with rugged, 500-denier nylon pack cloth outer shell for strength and durability, and soft 200-denier nylon liner for comfort. Front and back fold-out side panels provide side protection for a full range of sizes and fold in for added ventilation. Thin, low-profile design adds cushioning while permitting unrestricted freedom of movement while the longer torso length offers greater body coverage. Designed with a removable crotch strap that stows in pocket when not in use and features adjustable, elastic shoulders to help take-up excess fabric. Includes 3M™ Scotchlite™ Reflective Material, SOLAS-grade 6755 on front and back for improved nighttime visibility. Universal. Minimum 25 lb. buoyancy. USCG Approved, Type V.

Features:

- Quick-release belt with attached tether
- (4) Front adjustable straps
- Waist belt under foam to help prevent ride-up
- Stainless steel shoulder adjustment hardware allows for customized fit for tall or short wearers
- Chest pad covers center split
- Tether cover to keep loose straps confined
- Polyethylene foam absorbs shock and helps insulate
- Convenient web attachment strip to clip a whistle, extra carabiners, etc.
- Lash tabs on left and right chest and shoulders for fastening knife or tools
- Multiple belt loops and tunnels to retain loose ends
- Utility chest pad with multiple pockets and loops
- Lower front pocket provides room for storage

2000017317

things to remember should you ever have to abandon a ship:

- ✓ Ensure distress alerts have been sent. If you have emergency location beacons – including personal beacons – switch them on, and leave them on.
- ✓ Put on as many layers of warm clothing as possible, including your feet. Make sure to cover your head, neck, and hands. The outer layer should be as watertight as possible. Fasten clothing to improve insulation and to minimize cold water flushing in and out beneath the clothing.
- ✓ If an immersion suit is available put it on over the warm clothing.
- ✓ Put on a suitable lifejacket and secure it correctly. If in cold water you will quickly lose full use of your fingers. If the lifejacket is fitted with crotch and/or other retaining straps, make sure that they are pulled tight... If the lifejacket is of the automatic inflation type, inflate it manually after leaving the interior of the ship but before entering the water.
