**Streetscape®
Outdoor Receptacles**

Durable receptacles feature heavy-duty slatted steel construction with a recycled material content of 30% or greater and rigid, leakproof plastic liners that meet UL 94 Flammability Standard. Ideal for outdoor public spaces, these sturdy receptacles will not blow over and provide ample capacity. No. 22N330 features a hinged door for easy serviceability and the other receptacles feature funnel tops with 12" openings to help direct trash flow into the can. Tops are attached to the bodies with plastic coated steel cables to help prevent theft and vandalism.

Modular Waste Stations

Convenient stations provide a customized solution for your facility needs. Constructed of heavy-gauge, fire-safe steel with a recycled material content of 30% or greater. Each receptacle also includes a leakproof rigid plastic liner that meets UL-94 Flammability Standard. Bold and easy to read white graphics clearly identify receptacle contents to help reduce cross contamination caused by confusing labels. Both receptacles sizes fit side by side to create a station that can be reconfigured at any time.

Waste Containers

BASES

Crush-resistant. Rim and base are reinforced for durability. Containers are USDA approved and NSF certified. Nos. D5946 features venting channels to reduce the force needed to remove a full can liner. Square containers have more capacity than round containers.

DOMES TOPS

Self-closing swing lid. Also fit 55-gal. steel drums.

FUNNEL TOP

Guides refuse into the container. 6 7/8" center hole dia.

FLAT LIDS

Contoured, snap-on lids prevent moisture accumulation.

No. J2223

No. F8894

Waste Containers

Crush-resistant rims and bases are reinforced for durability. All round containers have innovative venting channels make lifting out liners easier, integrated cinches to secure can liners, and contoured base handles to improve grip. These features help increase productivity and safety. All BRUTE® containers feature reinforced bases to extend life and durability. USDA approved and NSF certified.

Step-On Containers

Satin Steel Antifingerprint—Step-on foot pedal opens lid, keeping hands free and away from can. Tight lid eliminates odors. Include a built-in bag holder.

Butterfly Open Steel—Step-on foot pedal allows 2 split half lids to open slowly from center. Keep odors trapped inside.

Plastic Hinged Top—Containers allow for convenient and hygienic disposal of waste with a sturdy step pedal that enables sanitary, hands-free opening and closing of the lid. Step-on containers aid in conforming to OSHA regulations. Lid closes securely to receptacle base to keep odors contained. Unique key-way notch holds standard size poly liners.

Recycling Containers and Stations

Deskside and Indoor Receptacles—Square recycling cans feature a rolled rim.

Outdoor Receptacles—Domed bottles/cans lid and 55-gal. base is designed for outdoor recycling collection. The domed lid has 2 large openings on both sides and built-in handles.

Single-Stream Recycling Containers—Heavy-gauge and fire-safe steel recyclers. Includes leakproof rigid plastic liners and lift off lids.

Multi-Stream Recycling Containers—Collect recyclables without cross-contamination. Heavy-gauge, fire-safe steel.

Indoor Receptacle Tops—Tops include trilingual ID labels (English, Spanish, French). Color-coded tops.

Round and Square Collection Receptacles—Include built-in handles and rolled rims.

Rollout and Trucks—Seamless plastic construction. Fit through standard office doorways. No. 4UAU8 has two 8" nonmarking wheels and a hinged, double-walled lid to keep pets and rain out.

Recycling Stations—Color-coded lids and trilingual material ID labels. Include 23-gal. removable rigid plastic liners.

Mobile Recycling Stations—No. 5GUR2 has durable powder-coated steel construction. Four 3" nonmarking casters and sturdy handle. Combine dolly with color-coded quarter-round receptacles to create a mobile recycling station.

High-Density Value Coreless Rolls

Blend of HDPE and LLDPE resins reduces the tendency for tears or punctures to "zipper". Perform on a level equivalent to gauges and microns.

Biostar Compostable Can Liners

Completely biodegradable, these liners are designed for organic waste collection and composting programs that help reduce landfill waste, pollution, and conserve water and other resources used in waste site management. Coreless rolls. Meet ASTM D6400 standards for compostable plastics for use in commercial facilities.

High-Visibility/Contractor Bags

High-Visibility Safety—Orange color for highway cleanups or applications where visibility is limited. Coreless roll.

Contractor Clean-Up—Highly puncture- and tear-resistant bags are made from Linear Low-Density Polyethylene (LLDPE). Star seal bottom with no side seams helps prevent leakage. Coreless roll.

Compactor—Designed for use in commercial compactors. Flat pack.

Drum Liner—Linear Low Density Polyethylene bags are extra thick for extreme heavy-duty applications. Flat pack.

Hospital Isolation Bags, Coreless Rolls

Color-coded bags provide a clear method of managing the disposal of biohazardous hospital waste. Imprinted in English and Spanish with the universal biohazard symbol, these bags easily identify contents: Infectious Waste (red), Infectious Linen (yellow), and Noncontagious Linen (blue and green).

HIGH-DENSITY POLYETHYLENE (HDPE)

The unique blend of first grade high molecular weight HDPE and LLDPE resins reduces the tendency for tears or punctures to "zipper."

LINEAR LOW-DENSITY POLYETHYLENE (LLDPE)

Top-quality resins add film strength for superior puncture and tear resistance. Certified to meet 165 g dart impact resistance ASTM D1709-01 and 480 g tear resistance ASTM D1922-00A.
